

Instruction for installing PDU5 Mobile Android app

The PDU5 app will be available in the PlayStore later this year. In the meantime, you can manually install the app, APK-file, on your android phone. Follow the next steps to be able to install the app.

General

1. Get the APK File on your Android Mobile phone

- Download it directly to your phone, OR
- Transfer it from your computer via USB, OR
- Use a cloud service like Google Drive or Dropbox.

2. Enable Installation from Unknown Sources *

- Go to **Settings > Security** (or **Privacy & security**, depending on your Android version).
- Look for **Install unknown apps** or **Install apps from unknown sources**. (e.g in menu item More Security Settings)
- Choose the app you'll use to open the APK (like your browser or file manager).
- Enable **Allow from this source**.

3. Open the APK File

- Use a file manager (like **Files by Google**).
- Locate the APK file.
- Tap it to begin installation.

4. Finish Installation

- Tap **Install**.
- After it's done, choose **Open** or **Done**.

*this is the generic path to allow installation from unknown sources, see next page for another path to enable installation from unknown sources on Samsung or Motorola phone

On a Recent Samsung Phone (e.g., Galaxy S21–S24):

1. Open **Settings**.
2. Go to **Apps**.
3. Tap the **three dots** in the upper-right corner and select **Special access**.
4. Tap **Install unknown apps**.
5. Choose the app you'll use to install the APK (like **My Files** or **Chrome**).
6. Toggle on **Allow from this source**.

On a Recent Motorola Phone (Stock Android):

1. Open **Settings**.
2. Tap **Apps & notifications** (or just **Apps**).
3. Tap **Advanced** to reveal more options.
4. Select **Special app access**.
5. Tap **Install unknown apps**.
6. Choose the app you'll use (like **Files**, **Chrome**, or **Gmail**).
